### WWTP Truck

The Waste Water Department is in need of an additional service truck due to the growth of lifts stations and other maintenance issues associated with the collection system. They have been working on obtaining quotes for a truck and are proposing the lowest cost option of the 3. The truck is larger and has additional tools that our current operational vehicles do not which will make in the field repairs and maintenance easier and more cost effective.

I am recommending that the department utilize a strategy of paying ½ of the truck up front and financing the remaining half over a 3 year period. Mr. Turner has worked with a few leasing options to make this work and has found a suitable solution.

I would recommend the purchase of the truck.

Pete
