

PROPOSAL

Issue:

In 2021, U.S. EPA adopted the Lead and Copper Rule Revisions (LCRR) which require public water systems to perform additional actions to better protect communities from exposure to lead in drinking water. One of these actions requires public water systems to complete a Lead Service Line Inventory (LSLI) of all lines in their system, including the portions owned by the utility and the customer. Public water systems in Indiana must submit LSLIs to IDEM by Oct. 16, 2024.

Proposal:

Our water department staff has obtained a quote from 120Water to assist in the lead service line inventory. There is grant funding available from the Indiana Finance Authority which will likely cover the cost of the necessary service line inventory. The grant proceeds would be paid directly to 120Water. However, in the event the town does not receive the grant we would need to be prepared to pay for the work.

Cost:

\$14,450.00

Cost to be paid from IFA Grant or ARPA Water.
