Storm Water Proposal

One of the areas that we have continual storm water issues is the corner of Tiger Dr and River Rd. As the school is currently working on a capital project in the empty field north of that intersection, they have placed additional drainage and retention structures in place that make solving this problem area viable. I've asked Dr. Hinshaw if the Town could partner with the School and their current contractor to have a storm water inlet(s) placed in that particular area and ran to the new storm retention/drainage area. He agreed and asked Pridemark to provide costs to install the desired drain pipes.

The price is \$21,785 which I'm asking the council to approve from our Storm Sewer Funds. This will help alleviate problems with road deterioration and allow for better pedestrian activity in the area after storm events.

Pete Olson
