

Project: Yorktown Fire Department

Attached is our proposal for the installation of a replacement Audio/Alerting System at Yorktown Fire Department. This proposal consists of different portions including Station-wide Audio plus some visual light/strobe alerting. The costs on the next page include all estimated costs from bare wire all the way to final termination and system configuration.

All equipment and installation services include a 2 year limited warranty from FDC, while some equipment may have longer manufactures warranty. This is a one time cost and this system does not require any monthly fees.

Thank you for the opportunity to quote this project.
