Agreement with Delaware County Regional Waste

In an effort to reduce stress to the waste water system at the Heritage Place Subdivision the owner has requested that sewer run south in to a manhole in Chase Trail Subdivision. This would prevent the need for an additional lift station. Delaware County Regional Waste serves the subdivision and willing to allow this to happen if the town is agreeable, they have drafted and presented the attached agreement which establishes the rates associated with the collection and still requires their services for maintenance. As the sewer ultimately is treated by the town, we need to have an agreement in place so that we have a charge for the users that are not running through the DCRWD flow meter. The agreement was drafted on rates and flows normalized by IDEM. I would recommend approval of this agreement to ensure that we are able to bill the district appropriately.
