### **Power Unit Purchase**

The field operation is in need of a new power unit that generates power for pumps, jack hammer and other tools while working at various sites in the community. Our current unit is over 20 years old, has served well, but is now starting to become an issue while working. A couple of times in the last few months the unit would not directly operate the pump while working on a water leak and did not have enough power to operate the jack hammer. This past weekend the pump was useless as our employees were working on a water leak.

We have gotten a number of quotes and I am recommending that we purchase the Stanley Unit which has dual tool power operation abilities. The water, sewer and street department will pay for the unit evenly.

Pete
