Snow Plow/Dump Trucks

The field ops department has been limping a couple of older snow plow trucks along for the last couple of years; and they have indicated that the availability of parts for repair is to the point where they do not exist. After a few different discussions, Tim has proposed moving down in size for the next replacement vehicle. Similar to every other vehicle purchase that we are trying to make at this time, the need to order the trucks has become the norm.

Tim and Fred have worked with a couple of different dealerships to obtain quotes. They are recommending the Chevrolet Silverado MD. After receiving these chassis, we will work with Clark Trucking to obtain the beds, plows, and spreaders.

I am recommending that you give the department approval to purchase 2 trucks to start our replacement.
