Subject: Yorktown, City of, Admin - Maintenance Building

James, Here is a new & revised quote for a 48KW and a 400 amp SE Rated ATS that Eldon requested. The one I emailed a few minutes ago did not have cost for curb side delivery (off loaded by others.) This has that additional cost.

I copied Eldon above sir. I'm happy to help. Thank you.

\$20,916.00 to include the following.

One (1) generator - RG48, 48 KW on LPV or natural gas (200 amps) at 240 volt. 1800 RPM 4.5L engine, 200 amp breaker, Includes battery, NO ATS

One (1)) ATS, 400 amp, Service Entrance Rated, NEMA 3R (outdoor or indoor) enclosed, 120/240 volt 1 phase, 60Hz, 2 pole

One (1) lot delivery of generator to job site, curb side – no off loading, on a flatbed truck. (Crane and off-loading by others.)

One (1) lot site testing, factory startup by factory technician. Assumes job site is in central Indiana. EVAPAR would inspect the installation, verify gas pressure, run-test system, and call in/set up the warranty. We fix any warranty issues at that time. When we leave the system has warranty and is in standby/auto mode waiting on a power outage and will automatically "exercise" run 1 time per week.

EVAPAR has been in the business of customer support since 1912. We offer 24/7/365 emergency service, comprehensive planned maintenance plans, parts support, technical support, standby rental generators with emergency delivery. More info at www.evapar.com

Notes:

We also sell generators around the following KW ratings: 7.5, 10, 14, 15, 18, 20, 22, 24, 26, 27, 32, 38, 45, 48, 50, 60, 70, 80, 100, 130, 150, 175, 200, 230, 250, 300, 350 and up to 2000KW units.

We sell All ATS sizes at 1 phase and/or 3 phase from small up to 4000 amps.
