

PROPOSAL

Issue:

Our stock of new water meters for homes is running low. These are needed for new construction as well as to replace failing meters as they age.

Proposal:

The Water Department would like to place an order for (100) 5/8 X ¾ meters and nodes to replenish our available stock. The lead time on these is usually 6-8 weeks so we need to keep a supply on hand.

Cost:

\$26,247.92

Cost to be paid from ARPA Water
