

## **PROPOSAL**

### **Issue:**

The generator at the Wasterwater Treatment Plant is past its useful life and needs to be replaced.

### **Proposal:**

BF&S engineers are assisting with the process. They have vetted this option (see attached quote) and recommend getting it on order now. There is an eight-month lead time. Because this quote is through the state procurement, Sourcewell, we are not required to solicit bids. There will be additional expense for installation and removal of the old generator once the new one arrives.

### **Cost:**

\$114,334.00

*Cost to be paid from WWTP Depreciation Expense 6203001450*
