

PROPOSAL

Issue:

The water department has exhausted our supply of new household water meters and we need to reorder for new home construction and to replace old meters.

Proposal:

We received a quote for a new system of Neptune smart meters through Utility Supply Company. This will help streamline billing and reduce misreads. This new system requires software upgrades and set-up. This is a one-time cost in addition to the attached order of a pallet of 100 meters. Additionally, we are switching out an existing 2" meter at a commercial customer and installing interface units at two customer locations that already have Neptune meters which is also included in the quote.

Cost:

\$64,261.23

Cost to be paid from Water Utility Depreciation 6103
