Lot Area and Set-back Standards Variance – 12450 W. Jackson St., Yorktown (Burke)

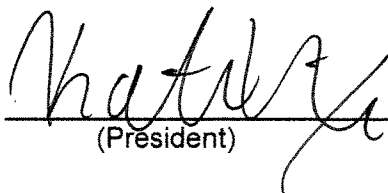

Kathy Vannice with Ashton Land Surveyors presented on behalf of the Petitioner Michael Burke. Depictions of the property and proposed moving of lots lines were presented to the members of the board present.

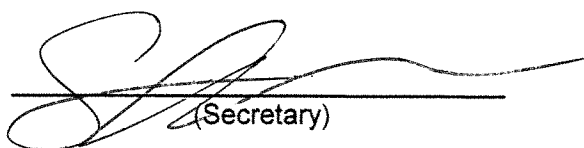

Chase Bruton described the project as well, and made mention that adjacent properties had similar set-back and lot area prior to the Town taking over planning and zoning in the rural area of Yorktown from the County.

Board members discussed the neighboring properties and similarities to what was being proposed. A short discussion ensued regarding the fact that the structures already existed and the property owner was just trying to combine an existing accessory structure into his newly built property.

Neighboring property owners were noticed and none appeared.

Brian Shrieve moved to approve the variance to allow the change. Dan MacDonald seconded the motion. The variance was approved 3-0. Chase Bruton will prepare an order and finding of fact.

(President)

(Secretary)
