Extension of Water and Sewer to All Steel Carports Property

When Park 1 was originally developed and constructed, water and sewer mains were not extended to the north of SR 332 where All Steel Carports is developing. Thankfully the Shore Corporation did put casings under SR 332 for both utilities as expansion was expected. The Town in cooperation with BF&S solicited bids for the construction of Water and Sewer utilities to the construction site, and only received one bid from MIDAS Construction.

I am recommending that we award the contract to MIDAS which will allow utilities to the site for construction. The respective utilities will pay from their budgets the associated costs.
