Conversion of Streetlights to LED by Indiana Michigan Power

I&M representative Rob Keisling has asked the town to consider replacement of the various streetlights that are maintained by I&M. I&M will remove the older technology of High Pressure Sodium and Mercury vapor to be replaced by LED heads. There is no additional cost to have this done other than our current bill that is paid monthly for maintenance.

I&M is working with the IURC and once a final determination is made, the cost per street light should reduce, but the current pricing helps pay for updating the fixtures. I recommend approving this, I believe the uniform look will be beneficial and in the long run will provide to additional cost savings for the community.
