

PROPOSAL

Issue:

Our existing asphalt roller is over 30 years old, no longer runs, and is unrepairable. This is a critical piece of equipment that is used every time we make under-road repairs.

Proposal:

Street Superintendent, Brady Patterson, solicited quotes for a replacement roller and recommends the model offered by McAllister, due to durability and availability.

Cost:

\$33,750.00

Cost to be paid from 50% MVH, 25% Water, 25% Sewer (Machinery, Equipment, & Vehicles)
