

## **PROPOSAL**

### **Issue:**

We have a stock of water meters that will be installed in the spring but we do not have the antennae nodes for remote reading of these meters. Because the nodes run on an internal battery, we typically do not keep a large supply on hand and order them as needed so they don't go bad prior to installation.

### **Proposal:**

Water Superintendent Jamie Mixell has solicited the following quote from Water Works Metrology. These 200 nodes will supply our existing meter stock.

### **Cost:**

\$18,186.00

*Cost to be paid from Water Repair & Maintenance Supplies 6101001231*
