Interlocal with Delaware County

There are a couple of issues that we are working with Delaware County. The first issue is an interlocal agreement that allows Delaware County to pave a short section of River Valley Dr. The area in question is from Tiger Dr. to Ridge View Dr. The county is going to do additional paving to the west but in a desire to not have an awkward start/stop location they are offering to pay for the labor of installation by county crews if the Town will pay for actual asphalt material. This is a benefit to both the town and county residents and I would recommend that we approve the interlocal.

Additionally, the County Commissioners are going to pave the Deerfield Trace Neighborhood north of Jackson near CR 800. There is a problem in that the roads have never been accepted from the developer. Due to our municipal limits encompassing that area and the interlocal that already exists with the county to maintain area's outside our Urban Core, the county is willing to provide the pavement and labor but they are asking us to accept the roads so that they can be sent to INDOT for recording into the appropriate street inventory. Joe Rhetts is working on a second document and I will attach to the agenda once that is provided. I would recommend that the council accept the roads also
