

Proposal to Purchase Vehicles – 2 Trucks

Issue

We have many situations where we need to haul items that are utilized on a scene back to the station for decontamination, cleaning and putting it back in service. Along with that we have three trailers that could be needed at moment's notice along with an ever-increasing call volume. This puts us in situations where our primary medical vehicle and secondary are out on calls at the same time. In addition to this our Chief's Vehicle is to a point it needs replaced. It is a 2006 Trail Blazer that was not setup to carry the weight that was put in it. We have put quite a but of money into the suspension, removed a lot of the weight and it is still having issues. With the cost of a new vehicle it is not worth continuing to put the money into this one.

Proposal

Purchase 2 new 2022 Crew Cab Trucks

Approval is being sought for the purchase of 2 new 2022 Crew Cab Trucks. One of these would replace the Chief's Vehicle and be put into service in that aspect. This vehicle stays in service and goes directly to scene. This places a senior level officer on scenes of large incidents quickly. When the Chief is out of town the Asst Chief would have it. The second truck would be a utility type of vehicle. This would haul back equipment along with the first truck from scenes to be decontaminated, it would haul trailers to scenes when one of the medical units is on a call or both. It would be used to take items to training grounds, pick up supplies for the station, take members to trainings, etc. It can also be used for a multitude of other reasons and is much less inexpensive that purchasing another large scale pickup like our medical trucks.

Rationale

Our current trucks have skid units in the rear and cannot haul anything in the beds, along with that the Chief's Car is failing. We have many instances where members of the department are using their personal vehicles to pickup supplies, equipment, haul training items and do jobs that these two trucks could accomplish. Along with that it would be covered under the town insurance. These trucks will more than pay for themselves by keeping our cabs clean of soiled or contaminated items on the way back from scenes, haul training equipment to the facilities, run necessary errands without putting the mileage on an Engine, Tanker or Rescue. Provide abilities to get trailers to the scene when needed. The Chief's vehicle will provide the ability that our current vehicle does. This includes getting a senior officer to the scene to evaluate, call for additional manpower from other departments, get a 360 all before the initial arrival of an apparatus.

Cost

Total costs will be no more than \$80,000.00

This would cover the cost of both 2022 Chevy Silverado Crew Cab 2500 HD trucks. Chevy is the only vendor at this time that was able to confirm they can get the trucks in a timely format, and they are over 30,000 dollars cheaper than both Toyota and Ford for comparable models. Toyota came in at 110,000 with no idea of possible delivery and Ford came in at 112,000 with the same issue on not being able to tell us when they are available. The quote is from Ed Martin Chevrolet that we received.

This can be covered without our actual budget, and we would not be asking for additional monies. We have been saving for this the entire year to see if we would be able to pull this off alongside the radio quote.

Summary

If we implement these two trucks it would give us the capabilities, we currently have with the Chief's Car but also allow us many other options. These are detailed above in the rationale section. We feel this is an economical way to address many items we currently address in a variety of other ways while still operating within our budget.
