For the last few years we've been working with temporary and part time employees at the Waste Water Treatment Plant. Caleb Mixel filled that role until last week, when he took a position out of state.

After having conversations with Alan and the rest of the staff, it is the recommendation that we fill that position with a full time employee more focused on the lab side of the work. This is due to the new requirements in our NPDES discharge permit which requires new testing for phosphorus and other effluent standards which has increased our lab workload.

Tonight I present Macon Shroyer, who recently graduated from Ball State with a degree in Chemistry and has spent the last 2 years working for the Muncie Sanitary district in the lab on weekends. Macon has a strong knowledge of the testing procedures and is qualified to start on day one running most of the lab operations that we are now required to perform.

Pete
