### Micro Surface Explanation

As part of the community crossing grant, we applied for funds for some streets that did not need overlay but did need treatment to help bring the street ratings higher. These types of treatments include crack seal, slurry seal and micro seal, all which are significantly less in cost per square foot and all which help expand the useful life of the road. Attached is the quote from Pavement Solutions for micro surface which will provide a full road treatment. I would recommend that the council accept the quote.
