

PROPOSAL

Issue:

WWTP Superintendent George Kane has requested a set of spare SCADA system parts to be kept at the plant. These parts are not quickly acquired and having a full set of spares at the plant will insure that we are still able to run if something breaks without having a three week lead time for delivery.

Proposal:

Toric Engineering has provided the following quote for all control panel parts for the system.

Cost:

\$13,906.00

Cost to be paid from WWTP Repair & Maintenance Supplies 6201001228
